

CS3997 Professional Practice
Fall 2022

Assignment 2 – Article Summary
Due: October 4th, 2022, by 10am.

Find an article of interest published by a member of the Faculty of Computer Science on an IT/CS related topic. This needs to be a ***technical*** article of 6-10 pages. The website <http://www.cs.unb.ca/people> provides a list of Faculty Members as a good starting point. As well, the “list of publications” from faculty members web pages can provide a starting point for you. Another approach would be to search for a faculty member through google to find one of their published articles.

Write a 750 word summary of the article. Hand in a copy of the original article along with your summary. Do not quote from the original article unless it is necessary.

Make sure that the article you choose is a technical or academic article, not a newspaper article, editorial, or equivalent. Please check with me if you are unsure.

Submit the printed article and your summary in the assignment bin by the due date.
