

SearchProfile Use Case Test Report

1 Introduction

1.1 Document Identifier
SearchProfile Test Case Report
December 14, 2021
University of New Brunswick
Mahmoud Moustafa

1.2 Scope

This use case enables users to search for profiles using keywords. This will return a list of the users that are associated with the keywords searched.

2 Details

2.1 Overview of Test Results

The system returned the result that was expected for the given input.

2.2 Detailed Test Results

2.2.1 TC18

The keywords entered did not match to an account's display name, returning an empty list, indicating that there is no account with the display name that has the keywords entered.

2.2.2 TC19

The keywords entered matched to a user's display name. The user's profile with the matching display name was returned to the user searching.
