

CS3997 Professional Practice
Fall 2022

Assignment 3
Due: November 1st, 2022, by 10:00am.

You are asked to read the following materials to learn about the differences between the GPL, BSD and the MIT licenses that are commonly used when people release software into the public domain.

- MIT - http://en.wikipedia.org/wiki/MIT_License
- GPL - http://en.wikipedia.org/wiki/GNU_General_Public_License
- BSD - http://en.wikipedia.org/wiki/BSD_licenses

Write a short report (1000 words) discussing which license you would choose if you were to distribute software into the public domain. Keep in mind that it is important for you to explain your decision. Once completed please submit your report via D2L.
